

Pocket Mop Sealed Bucket

INSTRUCTIONS

STEP 1

Load mops in sealing bucket microfiber side down, except for top mop which is microfiber-side up to prevent splashing.

STEP 2

Measure the correct amount of cleaning solution. See mix chart for proper addition rates. Do not estimate!

MIX CHART	MOPS	GALLONS	LITERS
	6	.37	1.4
	9	.50	1.9
	12	.75	2.8
	18	1.20	3.8
	21	1.25	4.7
	24	1.50	5.6

STEP 3

Add Solution – pour cleaning solution over mops evenly, and allow to penetrate mops.

STEP 4

When there is less than 1/2 inch of solution visible in the bucket, place lid on bucket and make sure lid is secure.

STEP 5

Flip bucket with lid on. Allow to sit in this position for up to five minutes.

STEP 6

Turn over top mop. Collapse pocket mop frame by stepping on lock release, and place frame into position on top mop. Press down as frame slips into pockets until frame locks into place.

STEP 7

Clean floors and any other water-safe surfaces. Each mop will clean 400-500 square feet.

STEP 8

Place soiled mops in proper receptacle by collapsing frame and letting pocket mop slide off frame. Repeat steps 6-8 until area is clean.
