

# Tab Mop Divided Bucket

## INSTRUCTIONS

### STEP 1

Collapse tab frame by pressing release on frame.

### STEP 2

Push tab of mop through end opening on frame. Press tab lock firmly to close. Repeat at other end of frame.

### STEP 3

Fill front compartment of divided bucket to desired level with properly diluted cleaning solution.

### STEP 4

Place collapsed mop in rear flushing compartment. Add enough clear water to cover mop.

### STEP 5

Remove wet mop from rear flushing compartment and wring to prevent dripping.

### STEP 6

Submerge mop in cleaner solution.

### STEP 7

Place mop in wringer and wring lightly to prevent dripping.

### STEP 8

Once mop is not dripping, place mop flat on floor and press lock in to place to secure frame.

### STEP 9

Clean floor; when mop becomes loaded with soil or dry, place soiled mop in rear flushing compartment and agitate to loosen soil. Wring mop until clean, then repeat steps 6-9 until area is clean.
