

# TUBE MOP SYSTEMS

Microfiber tube mops are more effective, easier to maintain, and last significantly longer than traditional cotton alternatives. Whether you are performance or value-driven, microfiber tube mops offer the best solution. When partnered with the NuFiber Divided Bucket, this system offers an end to dirty mop water.

## Features and Benefits

- Picks up more soil, debris, bacteria, and germs than traditional cotton mops
- Lasts 3-5 times longer than traditional cotton mop
- 5 inch scratch headband is long lasting and effective on stubborn topical marks
- Banded feature keeps mops looking great for its entire life
- Tube mops readily release soil load when properly flushed thereby eliminating the chance for that "sour" smell
- Holds more liquid than traditional cotton mop of similar size

## Standard sizes/colors

- Yellow small, green medium, blue large and orange extra large

## Other medium colors available

- Red, purple and blue

## Other large colors available

- Green and white
